12. SPECIALIZED SERVICE OR ARRANGEMENTS

12.3 CASES (Cont'd)

CASE NO: 2000-1
CUSTOMER: Wells Fargo
EFFECTIVE: 3-14-2000

DESCRIPTION: This Case will provide network to network information transfer (NNIT) connectivity or user to network information transfer (UNIT) connectivity and a 6 Mbps Permanent Virtual Connection (PVC). This service will be used in conjunction with 44.736 Mbps Frame Relay Service (FRS). The maximum Committed Information Rate (CIR) for a single 6 Mbps PVC is 6 Mbps, with no burst allowed beyond 6 Mbps. This Case provides Wells Fargo with the capability to take their 44.736 Mbps Frame Relay traffic between several customer node sites and the Company Frame Relay network.

The customer may also order incremental 6 Mbps PVC's for 44.736 Mbps UNIT or 44.736 Mbps NNIT ports already in service. The maximum number of 6 Mbps PVC's allowed is two per 44.736 Mbps port. Additional PVC's may also be provisioned to those 44.736 Mbps ports as set forth in Section 8, preceding. In addition to the 44.736 Mbps UNIT or 44.736 Mbps NNIT connectivity, the customer will order the required DS3 Service as set forth in Section 7.12, preceding and the required FRS Central Office Connecting Channel (COCC) as set forth in Section 8, preceding.

The term for this Case is 2 years. Discontinuance of service prior to March 13, 2001, will result in the assessment of Termination Liability as set forth in 8.1.5, preceding.

(C)

If this service becomes a general tariff offering within the term of this Case then this arrangement will be converted to the general offering at the applicable rates. If the customer chooses not to convert to the general tariff offering then the service will be terminated without assessing the Termination Liability and Waiver Policy.
